H. If stubborn stains are prevalent, spray stains with regular carpet cleaner.

I. Extraction Cleaning Procedure

1. Dilute extraction shampoo according to the directions on the container and fill machine with water.
2. Add defoamer to the hose and tank. Follow the directions on the container.
3. Start extraction shampooing in the upper left hand corner of the room or hall.
4. Follow the machine's manufacturer directions for feeding the cleaning solution onto the carpet.
5. Feed the shampoo solution as you pull back on the wand (avoid over wetting the carpet).
6. Make four or five passes on the carpet in an area 3' by 5'.
7. Go back over the area with the extractor wand with the shampoo solution valve closed.
8. Should rinsing be required, empty the extractor and fill with rinse water.
9. Go over the carpet again using water only, following the manufacturer's directions on the machine.
10. After extraction or rinsing, brush carpet pile in one direction -- nap up with a stiff brush or shag rake.
11. If furniture is to be replaced before the carpet is dry, use protective pads under the legs.
12. Avoid walking on carpet until dry.
13. When carpet is completely dry, vacuum thoroughly.
